

PRODUCT PROMOTION

JUNIOR ELECTRIC MACHINE

Following the success of our Pneumatic Small Press, we have pleasure in showing our new Junior Electric Machine.

The Junior Electric Machine comes complete with laser positioning for accuracy and is as user friendly as ever. The machine is supplied with its own table and is foot pedal operated. It is a very flexible machine which requires very little space. A single phase power supply is all that is needed for the machine to work.

Tooling can be supplied for our various components including rivets, eyelets, press studs, and slots.

Delivery times available upon request.
